“I never thought that I would study at University but this degree has given me the opportunity to combine academic study while gaining valuable coaching experience with coaching experience both home and through a three-month coaching placement in Aruba. I enjoy the different approaches to the course and the chance to study at LJMU and Everton. This has also given me the opportunity to continue playing football for Everton Football College in the National Youth League. I aim to complete the foundation degree and continue my last year with LJMU studying an Honours Degree in Sport Development.”

“The environment for Higher Education study at Everton suits me. The class sizes are small, the tutors are supportive and the different assessment methods enhance the learning experience. I am able to develop and use my practical coaching experience within my athletics coaching and gain an understanding of how sport is organised within the UK and how it contributes to society.

I never thought I would go to University but I am really glad I made the decision to study at Everton Football College.”
